

Any Job with Confidence.

The SS-22 unit is mounted on a standard tandem-axle truck. It is PTO powered and geared toward large mud-drilling projects. Yet it is compact enough to get into tight locations. With a maximum hook load of 66,250 lbs. and single-line pull of 18,000 lbs., this drill is not short on power. Order yours with an 18"- retractable table with one of the many mud-pump options and you can tackle just about any job. The SS-22 has an optional reverse-drilling package making it an excellent 300-500-ft. large-diameter drill.

SS-22

- Rated with a max. hook load of 66,250 lbs. on bare drum and single-line pull 18,000 lbs.
- Double-drum drawworks, equipped with two-plate air clutch
- 8.5"-, 10" , or 18"-retractable rotary table
- Multiple mud-pump options
- Optional chain pulldown
