DESIGN WATER TECHNOLOGIES

Design Water Technologies has been marketing Sterilene for three years. This chlorine is 200 times more effective than regular chlorine without controlling pH. It is also NSF 60 Certified, easy to mix, and has no problems with a short shelf life.

Design Water Technologies now offers Chlor-"Oust", a product that neutralizes or dechlorinates Sterilene once it is pumped out of the well or pipeline, for proper disposal.

"Oust" features:

- Dissolves very fast as a fine granule.
- Neutralizes 100 ppm (parts per million) chlorine (or Sterilene) to zero within four minutes of recirculation.
- Has easy-to-understand directions for usage on-site.
- Has an easy calculation.
- Easy and safe disposal to sanitary sewers or land disposal.
