

SMALLER BIT. SMALLER HAMMER. BIGGER IMPACT.

ROCK
XTREME™

**Less Rig
Vibration
During
Drilling!!**

Who says the next big thing in drilling can't be small?

Center Rock's new Rock Xtreme™ RX60 and RX65 bits and hammers deliver undisputable performance and profitability in even the most challenging operating conditions.

Our new bits - with 50% more actual spline area and no exhaust tube - weigh up to 60% less versus competitive offerings. That means optimum economy, reliability, and durability...and far less rig vibration during drilling, drastically reducing your downtime labor and replacement-part costs!

Our technology optimizes your impact.
