

# The number one pick in mineral exploration drilling fluids.

## And not just for our products.

In mineral exploration drilling, Baroid IDP's research, products, and retailer network set us apart. But what really makes us a drilling pro's first choice is our "army" of veteran field reps. Not afraid to get dirty, they will head for the job site or stay on the line—whatever it takes to solve your problem. You'll also find them teaching drillers, regulators, and retailers at our famous mud schools. (Still going strong after 49 years!) Basic in bentonite, Baroid IDP is also the leader in facilitating optimal performance.
